

Dear Mr Mohamed.

Thank you for sharing this feedback with us your client.

We are all affected by the social upheavals in our communities some how or other; and some more than others.

When one receives feedback such as these, it shows that at least for the community who is at the forefront of it all, there is still a glimpse of hope.

Such remarks by community members

inspire us to do more and to co operate, moving beyond provider and client relationship, serving a greater purpose which is health for all.

Security services had become a key requirement in delivering a quality patient centred health service ensuring carer and patient safety, thus becoming part of delivering a comprehensive service.

Thank you for your leadership in the carrying out of your contractual obligations and being a partner in the pursuit of the Department's per suit of reaching its objectives.

Best regards.

Berisford
